Education

University of Allahabad 6.4 CGPA
Bachelor of Computer Application *July. 2021 – July 2024*

Bishop Johnson School and College 67%
ISC (Math+Computer) *April. 2019 – April 2021*

Experience

Ganesyx September 2025 – Present
Fullstack Developer *Work From Office*

- Built and maintained scalable full-stack applications, managing frontend, backend, and database development.
- Improved platform performance using Next.js, Node.js, and MongoDB, reducing load time by 35%.
- Implemented authentication, role-based access, and payment integrations for production-ready systems.
- Worked with CI/CD pipelines, Git workflows, and code reviews to ensure clean and reliable releases.

Namaste Tech Solutions August 2024 – September 2025
Fullstack Developer *Work From Home*

- Worked remotely in a startup, delivering real-world projects for diverse clients.
- Collaborated directly with clients to understand requirements and provide tailored solutions.
- Developed full-stack web applications using React, Node.js, and MongoDB.
- Ensured timely delivery of high-quality software with proper testing and documentation.

Projects

Dynamic GIF Generator | *React, Firebase, Node.Js, Public API* July 2023 – September 2023
Live Link | *Source Code*

- Developed a web application that allows users to create and customize GIFs using various templates and effects.
- Implemented user authentication and profile management using Firebase.
- Integrated Google Authentication for secure user login and personalized experience.
- Built a real-time chat feature enabling users to communicate seamlessly within the platform.

Weather App | *HTML/CSS, Vanilla JavaScript, Public API , Git* November 2023 – January 2024
Link Link | *Source Code*

- Utilized a public API to fetch real-time weather data for various locations.
- Built a high-performance website where user can get the weather details of their location
- User can search weather of particular location.
- Responsive Design and App version provided for installation on multiple platforms

Technical Skills

Languages: C/C++, Java, Python, HTML, CSS, JavaScript,
Frameworks: React.Js, Next.Js, Node.Js, Express.Js, Django, Tkinter
Database: MongoDB, MySQL
Developer Tools: Git, Google Cloud Platform, VS Code, Postman, Developer Options

Achievements

Problems Solved: *Leetcode (500+), GeeksForGeeks (500+)*
Contests: *Codeforces 1364 (max), Codechef 3 Star (max)*
Courses: *Codehelp: Web Development Bootcamp (MERN Stack), Codehelp: Recursion and Backtracking*
Contribution: *Kontest: Chrome extension to remind all contests. I helped in update API calls.*
